Art Unit: 1634

NON-FINAL ACTION

1. The applicant's Preliminary Amendment filed 01 APR 05 has been entered. Following the entry of the Preliminary Amendment, **Claim(s) 274-286** is/are pending.

SEQUENCE RULES

2. This application complies with the sequence rules and the sequences have been entered by the Scientific and Technical Information Center.

35 USC § 112 - 1ST PARAGRAPH

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

CLAIM REJECTIONS under 35 USC § 112- 1ST PARAGRAPH

4. **Claim(s) 274-286** is/are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. For example, there is no basis in the specification for the limitation in Claims 274 and 282 which reads "whereby the end selection-based process of step (b) creates ligation-compatible ends." This is a new matter rejection.

Art Unit: 1634

REASON FOR ALLOWANCE

5. **Claims 274-286** appear to be allowable over the prior art of record because the prior art considered does not teach or reasonably suggest the method(s) of producing and isolating a polypeptide having at least one desirable property as recited.

CONCLUSION

6. **Claims 274-286** is/are rejected and/or objected to for the reason(s) set forth above.
